Technical Data Sheet

Neodymium Holding Magnet, Step Down

Utility-Grade assemblies for a wide variety of mass market applications. The BTN Series magnets use Neodymium Rare Earth magnets in a Zinc plated cup. BTN series magnets can be used with our available hooks.

Product Specifications

Shape:	Assembly
Tolerance:	.005
Material:	NdFeB
Plating:	Zn

Part No.	D	D	L	H	Tap Size (MG)	Holding Force (lbs)	Price
BTN13	.51	.24	.45	.18	M3	13.5	\$3.40

- All Measurements are in inches (unless otherwise noted)
- Direction of Magnetization (DOM) is through the thickness unless noted
- Unless otherwise specified, magnets will be furnished in magnetized condition
- Holding forces are approximate. These are average values obtained under laboratory conditions. Size, shape, and material of the test piece may affect actual pull forces
