Technical Data Sheet

Magnetic Sweeper Bars

Bunting® Permanent Magnetic Sweeper Bars are easy to mount, and easy to use. They clamp under forks for use with forklifts, or they can be suspended by eyebolts beneath pickups and other vehicles. Sweeper Bars are available in 36", 48", and 60" lengths in an extra-heavy-duty model (X model). For best results, Sweeper Bars should be suspended 2 to 4 inches above the floor or ground and vehicle speeds kept as low as practical for effective capture of ferrous parts and debris. To clean, just wipe objects off and away from the magnetic bar.

Product Specifications

Part No.	Pick Up Width	Depth	Price
XHDS-48	48"	2 13/16"	\$721.00

- All Measurements are in inches (unless otherwise noted)
- Direction of Magnetization (DOM) is through the thickness unless noted
- Unless otherwise specified, magnets will be furnished in magnetized condition
- Holding forces are approximate. These are average values obtained under laboratory conditions. Size, shape, and material of the test piece may affect actual pull forces
